Technical Specifications

Width	2 HP
Maximum Depth	42mm
Current Draw	+12V: 41mA max. -12V: 41mA max.

This is a 4-channel mixer suitable for audio as well as control voltage signals. Up to four inputs can be combined to a single output each with its own level control. The master output can also be attenuated. For every channel, a LED is used to visualize the positive portion of the signal.

Installation

When installing or removing a module from your case always turn off the power to the case and disconnect the power cable. Failure to do so may result in serious injury or equipment damage.

Ensure the 10-pin connector on the power cable is connected correctly to the module before proceeding. The red stripe on the cable must line up with the -12V pins on the module's power connector. The pins are indicated with the label -12V, a white stripe next to the connector, the words "red", or some combination of those indicators.
